

THE PRACTICE WILL REMAIN OPEN

Following the Government announcement on 31st October regarding the second national lockdown, the Dental Minister and the British Dental Association have confirmed that dentists and dentistry can remain open for urgent and routine dental services, including check-up's and hygienist services. We would like to reassure you that the practice will remain open and continue to provide our full range of dental care throughout the duration of the restrictions. The implementation of our extensive COVID-19 related safety measures, correct PPE, training and protocols ensure we are COVID-19 secure.

PLEASE REMEMBER:

- Only come to the practice if you have an appointment.
- Our door will be locked so please come at the time of your appointment. Please use the shoe sanitiser & ring the doorbell when you arrive.
- Please wear a mask to your appointment and follow the instructions given to you by our staff and observe social distancing.
- You will be asked to use hand sanitiser on entry and your forehead temperature scanned and you will be risk assessed for Covid-19.
- Our toilet facilities remain closed except on medical grounds.

Please be assured that appointments booked with us will remain in place and do not need to be rebooked or cancelled. However, if you have any dental issues or wish to reschedule, our reception team will be happy to assist you. If you are worried, are in a vulnerable category or have any questions, please get in contact with us.

Due to the current circumstances, our phone lines are very busy. To reschedule any appointments or to discuss any aspects of your care, please contact us via email at reception@wellingtondentalpractice.com.

Take care & kind regards,
Dr Barry Kasai
Practice Owner & Principle Dentist
